Reason for allowance

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-6, the prior arts fail to teach or fairly suggest a method for calibrating a propagation delay in a network trunk comprising a step of calculating a time delay T_x after reading out the time period T_t by an equation $T_x = (T_i - T_t)^2$ wherein the time delay T_x is caused by sending the trunk package on each of a plurality of channels between the first and the second network switches, in combination with other limitations, as specified in the independent claim 1.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
